DEMONSTRATORS OF ANATOMY.

# ANNUAL ANNOUNCEMENT.

1872-1873.

---

The *Thirty-second* Regular Course of Lectures in the Missouri Medical College will begin on Monday, the 14th of October, 1872, and continue five months.

A Preliminary Course of clinical and didactic instruction will begin on the 11th of September, and continue till the commencement of the regular lectures. As these preliminary lectures embrace subjects of great practical importance, such as are not usually reached in the regular course, it is hoped that all students, who can possibly do so, will be present and avail themselves of the advantages thus afforded. This preliminary course will be free to all.

The dissecting room will be open under the superintendence of the Professor of Anatomy and his assistants during the same period.

The Commencement for conferring degrees will be held early in March, 1873.

## NEW PROFESSORSHIP.

Since the last course in this institution a new chair has been established, that of Diseases of the Mind and Nervous System, and Medical Jurisprudence, and Dr. J. K. Bauduy has been appointed to fill the position.

## MEANS AND APPARATUS FOR DEMONSTRATIONS.

Natural Philosophy, Chemistry, Anatomy, Physiology, Histology and Pathological Anatomy, together form the corner-stone upon which the superstructure of rational medicine is built ; and it being

admitted that only through a familiarity with these branches can the student attain the degree of qualification necessary to constitute him a competent and successful practitioner, the Faculty has made every effort to meet the demands of a high professional standard and to furnish the means and instruments which will enable the students to acquire with greater facility the necessary instruction in these departments.

A number of important additions have been made to the Philosophical and Chemical Apparatus, so as to demonstrate by experiments the later modern advances of those sciences.

In addition to a number of Microscopes, such as are ordinarily used in the study of Histology and Pathological Anatomy, a *Microscope*, illuminated by an Electric Lamp from a battery of *ninety-six* elements, has been procured from Europe at large cost. This instrument projects the microscopical preparation upon a screen, magnified many thousand diameters, thus enabling the whole class to see the preparation simultaneously, and so saving much time and confusion. Moreover, by this mode of demonstration, through the *Electric Microscope*, the lecturer is much facilitated in his explanations, while the student is better prepared to pursue his examinations directly with the ordinary microscope, and to appreciate more readily what is there revealed.

In addition to the regular course of didactic and clinical lectures, the following special and practical advantages are provided :

#### PRACTICAL ANATOMY.

The dissecting rooms will hereafter be open throughout the year (except during July and August) under the superintendence of the Professor of Anatomy and his assistants, thus giving the student every opportunity and encouragement in the prosecution of his studies in this all-important branch. The Faculty desire to impress upon the students, both junior and senior, that it is not optional with them what portion of their time they devote to this branch, but that it is expected that they will attend the dissections in this school as long as they may be students thereof.

Anatomical material is both abundant and cheap ; the dissecting rooms are well lighted and ventilated, and furnished with modern comforts and conveniences, thus rendering the surroundings of the student, while at his work, as pleasant as possible.

## PATHOLOGICAL ANATOMY.

Every opportunity of making *post-mortem* examinations, and of causing the student to make the same under the superintendence of professors, will be afforded.

Pathological Anatomy, in its special relations, will be taught by the respective professors of the several practical branches.

## PRACTICAL GYNÆCOLOGY AND OBSTETRICS.

The Professor of Obstetrics and Diseases of Women has established a Gynæcological Clinic at the City Hospital, the female wards of which literally furnish more cases than can be examined and treated. Advanced students are formed into classes, which attend this clinic in rotation, thus giving every member the best opportunity to become practically familiar with every variety of this class of diseases.

With a view of giving students some experience in practical midwifery, a "Lying-in Charity" has been established, which is under the superintendence of Dr. G. M. Armstrong.

## CLINICAL MEDICINE.

The course on this branch is so conducted that the students are afforded abundant opportunities for the practice of auscultation, percussion, etc., at the bedside; while the application of the microscope and chemical tests, as aids in the diagnosis of disease, is made in the lecture room in all cases demanding their use. The use of the various forms of electricity, both as a therapeutic and diagnostic agent, will be demonstrated by the Professor of Clinical Medicine.

## PRACTICAL SURGERY.

The Professor of Surgery and his assistants will give special instructions in the application of bandages, surgical apparatus, etc., and in the performance of operations upon the cadaver in the operating room, during hours not regularly taken up with other exercises in this department. Each student is thus practically trained in all these manipulations.

### INSANITY AND NERVOUS DISEASES.

Students desiring to devote special attention to this department will have the privilege of regularly visiting St. Vincent's Insane Asylum with Prof. Bauduy, who has charge of the institution. This is one of the largest and best managed asylums in the country, and therefore affords peculiar facilities for the illustration of the course of lectures upon this branch.

### SPECIALTIES.

Diseases of the Eye and Ear being branches of medicine requiring special attention, the Faculty, two years ago, established a lectureship exclusively devoted to them, to which Dr. Chas. E. Michel was appointed. The wisdom of this appointment is now apparent in the interest shown by the classes, and in their marked improvement in this department. The subject is taught by the lecturer in a series of didactic lectures in the regular course, and abundantly illustrated at the Eye and Ear Clinic of the College Dispensary, where each student has an opportunity of examining for himself, under the direction of the teacher, the various forms of disease and injury of these organs, and of witnessing a great variety of operations.

Students also have the privilege of visiting the St. Louis Eye and Ear Infirmary and Infirmary for Diseases of the Throat, daily.

### VENEREAL AND SKIN DISEASES.

Our resources for the clinical illustration of these specialties are unsurpassed. In addition to the hundreds of cases seen at the College Dispensary and in the venereal wards of the City Hospital, we have the Marine Hospital, where there are about five hundred patients treated yearly.

### HOSPITALS AND HOSPITAL CLINICS.

St. Louis, with a population of nearly four hundred thousand, boasts of numerous large, conveniently arranged, and well filled hospitals, to which students are admitted free of charge. These institutions are used by the different professors in illustrating disease and injury at the bed-side, and in pointing out the various phases these assume in every-day practice.

THE CITY HOSPITAL is conveniently situated and readily accessible, offering the opportunity of a healthful walk of one-half or three-fourths of a mile from the College buildings, or, if the student prefers, by the street cars. It is supplied with a large number of beds, affording plentiful material and frequent examples of all the varied forms of disease and injury; is administered by an efficient and obliging staff, and contains a comfortable and capacious amphitheatre, where the lectures may be delivered and surgical operations performed. Here the Professor of Clinical Medicine holds two clinics each week, the Professor of Surgery two, and the Professor of Diseases of Women two.

THE MARINE HOSPITAL, a Government institution, is also readily accessible, and offers special advantages and attractions in some particular branches of Pathology connected with Surgery. So far as clinical teaching, both medical and surgical, is concerned, students of the Missouri Medical College will, through the courtesy and kindness of Dr. Melcher, the physician in charge, enjoy special advantages and privileges.

THE CITY QUARANTINE and SMALL-POX HOSPITALS offer peculiar advantages, and may be visited by students at their pleasure.

THE ST. LOUIS COUNTY INSANE ASYLUM, a very large institution, may be visited by advanced students in the company of a professor.

Through the kindness of the attending surgeons, the ST. LOUIS EYE AND EAR INFIRMARY and INFIRMARY FOR DISEASES OF THE THROAT (Nos. 1407 and 1409 North Twelfth street) is open to the students of the College. The attending surgeons hold daily clinics, and those who desire to do so may attend them regularly.

THE ST. LOUIS WESTERN DISPENSARY is also open to the students of the College.

### COLLEGE CLINICS.

But in addition to these hospital advantages, and in order to give still more prominence to clinical teaching, a College Dispensary has been established, where patients are regularly prescribed for and operations performed *daily* before the class. Experience has abundantly demonstrated the fact that medical colleges without clinical facilities, such as can only be afforded by large cities, with well appointed hospitals and other medical charities, are unworthy the patronage of an enlightened profession. In this

respect the Missouri Medical College is fortunately situated, and it will be the aim of the Faculty to use their peculiar clinical advantages in such a way as to render them of the greatest practical benefit to the students.

During the last session several hundred patients were prescribed for before the students, and numerous operations, many of them of the highest interest and importance, performed at the College Dispensary alone. Attached to the Dispensary, and under the College roof, is a ward appropriated to Gynæcological cases, which offers an additional and essential advantage to this department of the institution.

Special attention in Clinical Medicine and Surgery will be paid to the candidates for graduation, who will be required to examine, diagnosticate, and prescribe for selected cases under the direction of the Clinical Professors.

The College Dispensary is under the control of Professors Robinson, Anderson and Lankford, who will be daily present, prescribe and operate, aided by the corps of clinical assistants, whose duty it will be to be present at all times.

Arrangements have been made by which advanced students can act as assistants to the Professors of Surgery and Gynæcology.

### LECTURES.

While it is the intention of the Faculty to give the student as thorough an education as possible, they also aim to make it eminently practical. The philosophical and chemical apparatus, the system and means of clinical illustration, and the prominence given to *post-mortem* examinations, has been alluded to already. The means for the further illustration of the Didactic Course, such as anatomical preparations, models, pathological specimens, plates and drawings, and mineral and botanical specimens, are ample in each department, so that the lecturer has every assistance which such aids can afford in making a subject clear and impressive.

The following is the Order of Lectures for the Regular Course:

## ORDER OF LECTURES---REGULAR COURSE, 1872-73.

HOURS.	MONDAY.	TUESDAY.	WEDNESDAY.	THURSDAY.	FRIDAY.	SATURDAY.
9 to 10	DR. ROBINSON, Hospital Clinic.	DR. MOORE, Practice.	DR. MOORE, Practice.	DR. ROBINSON, Hospital Clinic.	DR. MOORE, Practice.	DR. ROBINSON, Physical Diagnosis.
10 to 11	DR. LANKFORD, Hospital Clinic.	DR. ANDERSON, Anatomy.	DR. ANDERSON, Anatomy.	DR. LANKFORD, Hospital Clinic.	DR. ANDERSON, Anatomy.	DR. LANKFORD, Surgery.
11 to 12	DR. MAUGHS, Hospital Clinic.	DR. MCPHEETERS, Materia Medica.	DR. HALL, Physiology.	DR. MAUGHS, Gynecolog'g'l Clinic.	DR. MCPHEETERS, Materia Medica.	DR. MCPHEETERS, Materia Medica.
12 to 1	College Clinic A.	College Clinic M.	College Clinic R.	College Clinic A.	College Clinic M.	College Clinic R.
3 to 4	DR. CURTMAN, Chemistry.	DR. MAUGHS, Obstetrics.	DR. CURTMAN, Chemistry.	DR. MAUGHS, Obstetrics.	DR. CURTMAN, Chemistry.	DR. LANKFORD, • Clinic at Marine Hospital.
4 to 5	DR. BAUDUY, Dis. Mind and Nervous Syst.	DR. LANKFORD, Surgery.	DR. BAUDUY, Dis. Mind and Nervous Syst.	DR. LANKFORD, Surgery.	DR. BAUDUY, Dis. Mind and Nervous Syst.	
5 to 6	DR. HALL, Physiology.	DR. HALL, Physiology.		DR. MICHEL, Ophthalmology.	DR. MAUGHS, Obstetrics.	
7 to 10	DR. ANDERSON, Dissections.	DR. ANDERSON, Dissections.	DR. ANDERSON, Dissections.	DR. ANDERSON, Dissections.	DR. ANDERSON, Dissections.	

## COLLEGE BUILDING.

The College, as it now stands, is a large three-story brick, with three commodious, neat and comfortable lecture-rooms, with ample additional rooms for dissection and clinical requirements. On the first floor is the main lecture-room; on the second, an amphitheatre particularly adapted for teaching Anatomy and all branches of Surgery. The lecture-room, on the third floor, is likewise arranged in the form of an amphitheatre, and is exclusively reserved for instruction in the Natural Sciences. The building is completely refitted in furniture and apparatus, with a view as well to comfort as instruction of the students.

## SPRING AND SUMMER COURSE.

This course begins on the first Monday in April, 1873, and continues three months. It embraces Lectures upon Diagnosis and Clinical Medicine; Clinical, Operative and Minor Surgery; Anatomy; Physiology; Obstetrics; Venereal Diseases; Ophthalmology; Histology; Microscopy; and has the *same* clinics and and clinical facilities as the regular course.

This course has been established to meet a want long felt, and we are happy to be able to announce that the session of 1872, just closed, has been successful beyond the anticipations of the most sanguine of its originators. The system of instruction is conducted by recitations and lectures, and by practical demonstrations in Histology, Anatomy, and the various means of Physical Diagnosis.

It is so designed and arranged as to be on the one hand a preparatory course for beginners, and on the other, by taking up subjects connected with the practical branches which are never reached in a regular course, to more thoroughly finish the education of advanced students. The advantages of this arrangement are so obvious that comment is unnecessary. The fee for the entire course is twenty-five dollars, which will be deducted from the fee for the succeeding Regular Course.

---

From this Announcement it will be seen that although the regular lecture term of the College embraces only five months, the time which may be employed by the student who desires to avail himself of all the advantages afforded by the school is really twice as great, or about ten months in each year.

It is with pleasure that the Faculty announces to the Alumni and other friends of the institution its rapidly increasing prosperity. During the session just closed, the number of students in attendance was double that of the preceding year, and they take this opportunity to present their acknowledgments to their numerous friends, for the interest and warm support which has been so unreservedly bestowed upon the school.

### REQUIREMENTS FOR THE DEGREE OF DOCTOR OF MEDICINE.

1. The candidate must be twenty-one years of age, of good moral character, and must have been engaged in the study of medicine at least three years, including the courses of lectures.
2. He must have attended two full courses of lectures, the *last* of which *must* have been in this institution; the *first* may have been in some other respectable school.
3. He must have attended the dissections and hospital clinics in this school as long as he was a student thereof.
4. He must write an acceptable Thesis on some subject connected with medicine.
5. He must, by the first of February, notify the Dean, in writing, of his intention to become a candidate, and at the same time deliver to him his Thesis, together with the graduation fee, which in case of withdrawal or rejection shall be returned. He shall also furnish to the Dean, at the same time, satisfactory evidence of having complied with all the preliminary requisites.
6. He must pass a satisfactory examination by the Faculty in all the branches taught in the College.
7. Practitioners of *long* standing will be admitted as candidates for graduation on attending one course of lectures in this institution.

### PRIZES.

*Two Prizes* are offered by the Society of the Alumni to the two students who shall, upon careful examination, exhibit the greatest proficiency in the several branches taught:

A first prize of a Microscope or \$60 in money.

A second prize of a Set of Instruments or \$40 in money.

The names of the successful competitors will be announced and the prizes awarded during the exercises of the Annual Commencement.

## F E E S .

For a full Course of Lectures,	-	-	-	-	-	\$105 00
Matriculation Fee (paid but once),	-	-	-	-	-	5 00
Demonstrator's Fee,	-	-	-	-	-	10 00
Graduation Fee,	-	-	-	-	-	20 00
Hospital Tickets	-	-	-	-	-	Free.

The fees must be paid promptly at the beginning of the term, as the tickets will be required to be exhibited to the Dean after the expiration of the second week of the session.

Physicians residing in or passing through the city are cordially invited to attend the lectures and clinics of the College.

Graduates of other regular schools are admitted to the course of lectures on paying the matriculation fee only.

Students may attend the lectures of one or more Professors, on paying the matriculation fee, and purchasing single tickets at \$15 each.

Those desiring practical instruction in Analytical Chemistry can obtain it at moderate expense.

Any further information will be cheerfully furnished by the Dean, to whom all business communications should be addressed, although letters directed to any member of the Faculty will receive prompt attention.

Students, on arriving in the city, will please call on the Dean at his office, northeast corner of Sixth and Walnut streets.

JOHN S. MOORE, M.D.,

*Dean of Faculty,*

*Northeast corner Sixth and Walnut streets.*

## TEXT BOOKS.

Students are advised to furnish themselves with at least one author in each of the following classes:

*Surgery*—ERICHSEN, ASHHURST, GROSS, DRUITT, HOLMES, BILL-ROTH.

*Practice of Medicine*—HARTSHORNE, NIEMEYER, AITKIN.

*Materia Medica*—WOOD, STILLE, PEREIRA, WARING, BIDDLE, U. S. Dispensatory.

*Physiology*—DALTON, MARSHALL, CARPENTER.

*Chemistry*—ROSCOE, FOWNES (BRANDE & TAYLOR).

*Toxicology*—TAYLOR, BECK.

*Pharmacy*—MOHR, REDWOOD & PROCTOR, PARRISH, U. S. Dispensatory.

*Obstetrics*—CAZEAUX, HODGE, BEDFORD.

*Diseases of Women*—THOMAS, HEWITT, SIMS.

*Diseases of Children*—SMITH, MEIGS & PEPPER, VOGEL.

*Anatomy*—GRAY, WILSON, LEIDY, HOLDEN (Dissector).

*Clinical Medicine*—BARCLAY'S MEDICAL DIAGNOSIS, DA COSTA'S MEDICAL DIAGNOSIS, TANNER'S CLINICAL MEDICINE.

*Nervous Diseases*—HAMMOND, TODD.

*Insanity*—MAUDSLEY, BUCKNILL, TUKE.

*Histology*—FREY'S MICROSCOPE.

## ALUMNI ASSOCIATION OF THE COLLEGE.

After a preliminary organization, the Association held its first annual meeting and banquet on the 6th of March, 1872. The Address was delivered by Dr. Jno. S. Moore, upon the "History of the College," which was subsequently ordered to be published. Copies may be had from the Secretary of the Association.

The officers for the year are : President, Dr. G. M. B. Maughs ; Vice-President, Dr. Wm. S. Edgar ; Secretary, Dr. H. Tuholsky ; Treasurer, Dr. L. P. Pollman.

The next annual meeting will take place immediately after the Commencement Exercises of the College, early in March, 1873, at which time important business matters will be submitted to the Association. The Annual Address will be delivered by a distinguished member of the profession, after which there will be a banquet.

All graduates of the School are hereby cordially invited to be present.

G. M. B. MAUGHS, M.D., *President.*

H. TUHOLSKY, M.D., *Secretary.*
